

# GRANICRETE PRO...FLOORING SYSTEM TRAINING WORKSHOPS

*Click on photos for enlarged view. SCROLL DOWN TO REGISTER.*

**1.5 days.....\$499.00**

[Discounts are available for additional attendees on the same reservation.](#)

We emphasize the word "Authentic" with our polymer modified concrete overlayment system because that is the look you achieve. Turning ugly concrete into custom stone finishes is core to our business. Our products have stood the test of time delivering stunning looks to customers around the world for over a decade in the harshest of climates.

The durability and versatility of our flooring system for indoor and outdoor use is amazing. Outdoor uses included pool decking, patios, driveways, entryways, and garage flooring. Indoor application with our products provides exceptional durability, life, and luxury custom looks for homes, restaurants, stores, and multi-tenant dwellings. Through our system the limitations of tile size and unlevel flooring that the tile companies have is eliminated. Now the large sized tile can be provided as the consumer desires and virtually wherever they desire.

This class includes a comprehensive reference manual, video presentations and hands-on training to learn Granicrete's alternative flooring system suitable for interior and exterior applications. You will complete four sample boards to get your portfolio started.

Although this class is designed for professional applicators, creative homeowners are welcome to attend. A continental breakfast and lunches are included in the class fee. A pre-study manual will be emailed upon receipt of your registration. No class refunds are allowed once the study materials have been sent to you. See our [class policies](#).

**Level of Instruction: All levels**  
**Product Education: Granicrete**

**GC# 07148...Wednesday & Thursday, July 14, 8:00am-5:00pm & July 15, 8:00am-Noon**
